## Non-Trucking Automobile Liability (NTAL)

Non-Trucking Automobile Liability coverage is intended to provide liability insurance to the owner operator who has permanently leased the insured vehicle to a motor carrier and is not using that vehicle for business use at the time of the loss. Coverage takes effect if the truck is being operated outside the scope of the motor carrier's control or direction, and with no economic benefit to the owner-operator or the lease company.

The Non-Trucking policy is a standard ISO Business Auto Coverage form with the Non-Trucking endorsement(s). Along with additional clarifying manuscript endorsements, the TIS policy form provides the most comprehensive coverage in the business.

Agents, contact us today to discuss what we can do for your clients and learn how our coverage is superior to the competition.
